TO: Interested Parties / Applicant

RE: American Colloid Company / MPR 123-18111-00021

FROM: Paul Dubenetzky
Chief, Permits Branch
Office of Air Quality

Notice of Decision: Approval - Effective Immediately

Please be advised that on behalf of the Commissioner of the Department of Environmental Management, I have issued a decision regarding the enclosed matter. Pursuant to IC 13-17-3-4 and 326 IAC 2, this approval is effective immediately, unless a petition for stay of effectiveness is filed and granted, and may be revoked or modified in accordance with the provisions of IC 13-15-7-1.

If you wish to challenge this decision, IC 4-21.5-3-7 and IC 13-15-7-3 require that you file a petition for administrative review. This petition may include a request for stay of effectiveness and must be submitted to the Office Environmental Adjudication, 100 North Senate Avenue, Government Center North, Room 1049, Indianapolis, IN 46204, **within eighteen (18) calendar days of the mailing of this notice**. The filing of a petition for administrative review is complete on the earliest of the following dates that apply to the filing:

- (1) the date the document is delivered to the Office of Environmental Adjudication (OEA);
- (2) the date of the postmark on the envelope containing the document, if the document is mailed to OEA by U.S. mail; or
- (3) The date on which the document is deposited with a private carrier, as shown by receipt issued by the carrier, if the document is sent to the OEA by private carrier.

The petition must include facts demonstrating that you are either the applicant, a person aggrieved or adversely affected by the decision or otherwise entitled to review by law. Please identify the permit, decision, or other order for which you seek review by permit number, name of the applicant, location, date of this notice and all of the following:

- (1) the name and address of the person making the request;
- (2) the interest of the person making the request;
- (3) identification of any persons represented by the person making the request;
- (4) the reasons, with particularity, for the request;
- (5) the issues, with particularity, proposed for considerations at any hearing; and
- (6) identification of the terms and conditions which, in the judgment of the person making the request, would be appropriate in the case in question to satisfy the requirements of the law governing documents of the type issued by the Commissioner.

If you have technical questions regarding the enclosed documents, please contact the Office of Air Quality, Permits Branch at (317) 233-0178. Callers from within Indiana may call toll-free at 1-800-451-6027, ext. 3-0178.

Ms. Tracey Coyle
American Colloid Company
P.O.Box 279, 11645 Hwy. 545
Troy, IN 47588

Re: 123-18111-00021
First Minor Permit Revision to
FESOP 123-12215-00021

Dear Ms. Coyle:

American Colloid Company was issued a permit on November 27, 2000 for a stationary commercial coal grinding and clay blending plant that manufactures additives. A letter requesting changes to this permit was received on September 5, 2003. Pursuant to the provisions of 326 IAC 2-8-11.1 a minor permit revision to this permit is hereby approved as described in the attached Technical Support Document.

The revision consists of modifications of the exhaust point locations of several emission units. These changes will not increase the potential to emit from the source and will not trigger any additional Federal or State rules that are applicable to the source. These changes will result in change in the methods used to demonstrate or monitor compliance by eliminating the need for visible emission notations. Presently there are six emission units controlled by baghouses which in turn are exhausted to stacks. American Colloid Company is planning to change the exhaust points of these baghouses so that the exhaust points are located inside the building.

Pursuant to 326 IAC 2-8-11.1, this permit shall be revised by incorporating the minor permit revision into the permit. All other conditions of the permit shall remain unchanged and in effect. Please attach a copy of this modification and the following revised permit to the front of the original permit.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Femi Ogunsola/EVP, c/o OAQ, 100 North Senate Avenue, P.O. Box 6015, Indianapolis, Indiana, 46206-6015, or call at (973) 575-2555, press 0 and ask for Femi Ogunsola or extension 3241.

Sincerely,

SECTION A SOURCE SUMMARY

This permit is based on information requested by the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ). The information describing the source contained in conditions A.1 through A.3 is descriptive information and does not constitute enforceable conditions. However, the Permittee should be aware that a physical change or a change in the method of operation that may render this descriptive information obsolete or inaccurate may trigger requirements for the Permittee to obtain additional permits or seek modification of this permit pursuant to 326 IAC 2, or change other applicable requirements presented in the permit application.

A.1 General Information [326 IAC 2-8-3(b)]

The Permittee owns and operates a commercial coal grinding and clay blending plant that manufactures additives.

Authorized individual:	Plant Manager
Source Address:	Tell City Industrial Park, Troy, Indiana, 47588
Mailing Address:	PO Box 160, Belle Fourche, SD 57717
SIC Code:	3295
Source Location Status:	Perry
County Status:	Attainment for all criteria pollutants
Source Status:	Federally Enforceable State Operating Permit (FESOP) Minor Source, under PSD Rules; Minor Source, Section 112 of the Clean Air Act

A.2 Emission Units and Pollution Control Equipment Summary [326 IAC 2-8-3(c)(3)]

This stationary source consists of the following emission units and pollution control devices:

- (a) one (1) Coal bulk unloading, handling and storage operation, constructed July 30, 1998, with a maximum capacity of 48 tons per hour (TPH), using a baghouse (BH-13) for PM and PM10 control, and exhausting to a point designated as DC-6, inside the building;
- (b) one (1) Coal milling operation, constructed July 30, 1998, with a maximum capacity of 10 TPH, using a baghouse (BH-14) for PM and PM10 control, and exhausting to a point designated as DC-1, inside the building;
- (c) one (1) Coal screening operation, constructed July 30, 1998, with a maximum capacity of 10 TPH, using a baghouse (BH-15) for PM and PM10 control, and exhausting to a point designated as DC-7, inside the building;
- (d) one (1) Raw materials unloading operation, constructed July 30, 1998, with a maximum capacity of 32 TPH, using a baghouse (BH-01) for PM and PM10 control, and exhausting inside the building;
- (e) one (1) Raw materials storage tank identified as Tank A, constructed July 30, 1998, with a maximum capacity of 32 TPH, using a baghouse (BH-02) for PM and PM10 control, and exhausting to a point designated as BV-A, inside the building;
- (f) one (1) Raw materials storage tank identified as Tank C, constructed July 30, 1998, with a maximum capacity of 32 TPH, using a baghouse (BH-03) for PM and PM10 control, and exhausting to a point designated as BV-C, inside the building;

- (g) one (1) Raw materials storage tank identified as Tank B&D, constructed July 30, 1998, with a maximum capacity of 32 TPH, using a baghouse (BH-04) for PM and PM10 control, and exhausting to a point designated as BV-BD, inside the building;
- (h) one (1) Elevator Conveyor identified as # 1, constructed July 30, 1998, with a maximum capacity of 35 TPH, using a baghouse (BH-17) for PM and PM10 control, and exhausting inside the building;
- (i) one (1) Elevator Conveyor identified as # 2, constructed July 30, 1998, with a maximum capacity of 35 TPH, using a baghouse (BH-18) for PM and PM10 control, and exhausting inside the building;
- (j) one (1) Blender/Lump breaker operation, constructed July 30, 1998, with a maximum capacity of 35 TPH, using a baghouse (BH-05) for PM and PM10 control, and exhausting to a point designated as DC-4 inside the building;
- (k) one (1) Materials transfer operation, constructed July 30, 1998, with a maximum capacity of 35 TPH, using a baghouse (BH-12) for PM and PM10 control, and exhausting inside the building;
- (l) one (1) Blender elevator, constructed July 30, 1998, with a maximum capacity of 35 TPH, using a baghouse (BH-06) for PM and PM10 control, and exhausting to a point designated as BV-3, inside the building;
- (m) one (1) Outbound storage tank, constructed July 30, 1998, with a maximum capacity of 35 TPH, using a baghouse (BH-789) for PM and PM10 control, and exhausting inside the building;
- (n) One (1) Product loadout operation, constructed July 30, 1998, with a maximum capacity of 100 TPH, using a baghouse (BH-10) for PM and PM10 control, and exhausting to a point designated as DC-3, inside the building; and
- (o) One (1) Packaging operation, constructed July 30, 1998, with a maximum capacity of 7 TPH, using a baghouse (BH-11) for PM and PM10 control, and exhausting inside the building.

A.3 Insignificant Activities [326 IAC 2-7-1(21)] [326 IAC 2-8-3(c)(3)(I)]

This stationary source does not currently have any insignificant activities, as defined in 326 IAC 2-7-1(21).

A.4 FESOP Applicability [326 IAC 2-8-2]

This stationary source, otherwise required to have a Part 70 permit as described in 326 IAC 2-7-2(a), has applied to the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ) for a Federally Enforceable State Operating Permit (FESOP).

A.5 Prior Permit Conditions

- (a) This permit shall be used as the primary document for determining compliance with applicable requirements established by previously issued permits.
- (b) If, after issuance of this permit, it is determined that the permit is in nonconformance with an applicable requirement that applied to the source on the date of permit issuance, including any term or condition from a previously issued construction or operation permit, IDEM, OAQ, shall immediately take steps to reopen and revise this permit and issue a

compliance order to the Permittee to ensure expeditious compliance with the applicable requirement until the permit is reissued.

SECTION B GENERAL CONDITIONS

B.1 Permit No Defense [IC 13]

Indiana statutes from IC 13 and rules from 326 IAC, quoted in conditions in this permit, are those applicable at the time the permit was issued. The issuance or possession of this permit shall not alone constitute a defense against an alleged violation of any law, regulation or standard, except for the requirement to obtain a FESOP under 326 IAC 2-8.

B.2 Definitions [326 IAC 2-8-1]

Terms in this permit shall have the definition assigned to such terms in the referenced regulation. In the absence of definitions in the referenced regulation, the applicable definitions found in the statutes or regulations (IC 13-11, 326 IAC 1-2, and 326 IAC 2-7) shall prevail.

B.3 Permit Term [326 IAC 2-8-4(2)]

This permit is issued for a fixed term of five (5) years from the original date, as determined in accordance with IC 4-21.5-3-5(f) and IC 13-15-5-3. Subsequent revisions, modifications, or amendments of this permit do not affect the expiration date.

B.4 Enforceability [326 IAC 2-8-6]

Unless otherwise stated, all terms and conditions in this permit, including any provisions designed to limit the source's potential to emit, are enforceable by IDEM, the United States Environmental Protection Agency (U.S. EPA) and by citizens in accordance with the Clean Air Act.

B.5 Termination of Right to Operate [326 IAC 2-8-9] [326 IAC 2-8-3(h)]

The Permittee's right to operate this source terminates with the expiration of this permit unless a timely and complete renewal application is submitted at least nine (9) months prior to the date of expiration of the source's existing permit, consistent with 326 IAC 2-8-3(h) and 326 IAC 2-8-9.

B.6 Severability [326 IAC 2-8-4(4)]

The provisions of this permit are severable; a determination that any portion of this permit is invalid shall not affect the validity of the remainder of the permit.

B.7 Property Rights or Exclusive Privilege [326 IAC 2-8-4(5)(D)]

This permit does not convey any property rights of any sort, or any exclusive privilege.

B.8 Duty to Supplement and Provide Information [326 IAC 2-8-3(f)] [326 IAC 2-8-4(5)(E)] [326 IAC 2-8-5(a)(4)]

- (a) The Permittee, upon becoming aware that any relevant facts were omitted or incorrect information was submitted in the permit application, shall promptly submit such supplementary facts or corrected information to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

The submittal by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (b) The Permittee shall furnish to IDEM, OAQ, within a reasonable time, any information that IDEM, OAQ may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit. The submittal by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1). Upon request, the Permittee shall also furnish to IDEM, OAQ, copies of records required to be kept by this permit or, for information

claimed to be confidential, the Permittee may furnish such records directly to the U. S. EPA along with a claim of confidentiality. [326 IAC 2-8-4(5)(E)].

- (c) The Permittee may include a claim of confidentiality in accordance with 326 IAC 17. When furnishing copies of requested records directly to U. S. EPA. The Permittee may assert a claim of confidentiality in accordance with 40 CFR 2, Subpart B.

B.9 Compliance Order Issuance [326 IAC 2-8-5(b)]

IDEM, OAQ may issue a compliance order to this Permittee upon discovery that this permit is in nonconformance with an applicable requirement. The order may require immediate compliance or contain a schedule for expeditious compliance with the applicable requirement.

B.10 Compliance with Permit Conditions [326 IAC 2-8-4(5)(A)] [326 IAC 2-8-4(5)(B)]

- (a) The Permittee must comply with all conditions of this permit. Noncompliance with any provisions of this permit, except those specifically designated as not federally enforceable, is grounds for:
 - (1) Enforcement action;
 - (2) Permit termination, revocation and reissuance, or modification; and
 - (3) Denial of a permit renewal application.
- (b) It shall not be a defense for the Permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.
- (c) An emergency does constitute an affirmative defense in an enforcement action provided the Permittee complies with the applicable requirements set forth in condition B, Emergency Provisions.

B.11 Certification [326 IAC 2-8-3(d)] [326 IAC 2-8-4(3)(C)(i)] [326 IAC 2-8-5(1)]

- (a) Where specifically designated by this permit or required by an applicable requirement, any application form, report, or compliance certification submitted shall contain certification by a authorized individual of truth, accuracy, and completeness. This certification, shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.
- (b) One (1) certification shall be included, using the attached Certification Form, with each submittal requiring certification.
- (c) An authorized individual is defined at 326 IAC 2-1.1-1(1).

B.12 Annual Compliance Certification [326 IAC 2-8-5(a)(1)]

- (a) The Permittee shall annually submit a compliance certification report which addresses the status of the source's compliance with the terms and conditions contained in this permit, including emission limitations, standards, or work practices. The initial certification shall cover the time period from the date of final permit issuance through December 31 of the same year. All subsequent certifications shall cover the time period from January 1 to December 31 of the previous year, and shall be submitted in letter form no later than July 1 of each year to:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

- (b) The annual compliance certification report required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ, on or before the date it is due.
- (c) The annual compliance certification report shall include the following:
 - (1) The appropriate identification of each term or condition of this permit that is the basis of the certification;
 - (2) The compliance status;
 - (3) Whether compliance was continuous or intermittent;
 - (4) The methods used for determining the compliance status of the source, currently and over the reporting period consistent with 326 IAC 2-8-4(3); and
 - (5) Such other facts as specified in Sections D of this permit, IDEM, OAQ, may require to determine the compliance status of the source.

The notification which shall be submitted by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

B.13 Preventive Maintenance Plan [326 IAC 1-6-3] [326 IAC 2-8-4(9)] [326 IAC 2-8-5(a)(1)]

- (a) If required by specific condition(s) in Section D of this permit, the Permittee shall prepare and maintain Preventive Maintenance Plans (PMPs) within ninety (90) days after issuance of this permit, including the following information on each facility:
 - (1) Identification of the individual(s) responsible for inspecting, maintaining, and repairing emission control devices;
 - (2) A description of the items or conditions that will be inspected and the inspection schedule for said items or conditions; and
 - (3) Identification and quantification of the replacement parts that will be maintained in inventory for quick replacement.

If due to circumstances beyond the Permittee's control, the PMPs cannot be prepared and maintained within the above time frame, the Permittee may extend the date an additional ninety (90) days provided the Permittee notifies:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

The PMP and the PMP extension notification do not require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (b) The Permittee shall implement the PMPs as necessary to ensure that failure to implement

a PMP does not cause or contribute to a violation of any limitation on emissions or potential to emit.

- (c) A copy of the PMPs shall be submitted to IDEM, OAQ, upon request and within a reasonable time, and shall be subject to review and approval by IDEM, OAQ. IDEM, OAQ, may require the Permittee to revise its PMPs whenever lack of proper maintenance causes or contributes to any violation. The PMP does not require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (d) Records of preventive maintenance shall be retained for a period of at least five (5) years. These records shall be kept at the source location for a minimum of three (3) years. The records may be stored elsewhere for the remaining two (2) years as long as they are available upon request. If the Commissioner makes a request for records to the Permittee, the Permittee shall furnish the records to the Commissioner within a reasonable time.

B.14 Emergency Provisions [326 IAC 2-8-12]

- (a) An emergency, as defined in 326 IAC 2-7-1(12), is not an affirmative defense for an action brought for noncompliance with a federal or state health-based emission limitation, except as provided in 326 IAC 2-8-12.
- (b) An emergency, as defined in 326 IAC 2-7-1(12), constitutes an affirmative defense to an action brought for noncompliance with a health-based or technology-based emission limitation if the affirmative defense of an emergency is demonstrated through properly signed, contemporaneous operating logs or other relevant evidence that describes the following:
 - (1) An emergency occurred and the Permittee can, to the extent possible, identify the causes of the emergency;
 - (2) The permitted facility was at the time being properly operated;
 - (3) During the period of an emergency, the Permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards or other requirements in this permit;
 - (4) For each emergency lasting one (1) hour or more, the Permittee notified IDEM, OAQ, within four (4) daytime business hours after the beginning of the emergency, or after the emergency was discovered or reasonably should have been discovered;

Telephone No.: 1-800-451-6027 (ask for Office of Air Quality, Compliance Section)
or,
Telephone No.: 317-233-5674 (ask for Compliance Section)
Facsimile No.: 317-233-5967

Failure to notify IDEM, OAQ, by telephone or facsimile within four (4) daytime business hours after the beginning of the emergency, or after the emergency is discovered or reasonably should have been discovered, shall constitute a violation of 326 IAC 2-8 and any other applicable rules. [326 IAC 2-8-12(f)]

- (5) For each emergency lasting one (1) hour or more, the Permittee submitted the attached Emergency Occurrence Report Form or its equivalent either by mail or facsimile to:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

within two (2) working days of the time when emission limitations were exceeded due to the emergency.

The notice fulfills the requirement of 326 IAC 2-8-4(3)(C)(ii) and must contain the following:

- (A) A description of the emergency;
- (B) Any steps taken to mitigate the emissions; and
- (C) Corrective actions taken.

The notification which shall be submitted by the Permittee does not require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (6) The Permittee immediately took all reasonable steps to correct the emergency.
- (c) In any enforcement proceeding, the Permittee seeking to establish the occurrence of an emergency has the burden of proof.
 - (d) This emergency provision supersedes 326 IAC 1-6 (Malfunctions). This permit condition is in addition to any emergency or upset provision contained in any applicable requirement.
 - (e) IDEM, OAQ, may require that the Preventive Maintenance Plans required under 326 IAC 2-8-3(c)(6) be revised in response to an emergency.
 - (f) Failure to notify IDEM, OAQ, by telephone or facsimile of an emergency lasting more than one (1) hour in accordance with (b)(4) and (5) of this condition shall constitute a violation of 326 IAC 2-8 and any other applicable rules.
 - (g) Operations may continue during an emergency only if the following conditions are met:
 - (1) If the emergency situation causes a deviation from a technology-based limit, the Permittee may continue to operate the affected emitting facilities during the emergency provided the Permittee immediately takes all reasonable steps to correct the emergency and minimize emissions.
 - (2) If an emergency situation causes a deviation from a health-based limit, the Permittee may not continue to operate the affected emissions facilities unless:
 - (A) The Permittee immediately takes all reasonable steps to correct the emergency situation and to minimize emissions; and

- (B) Continued operation of the facilities is necessary to prevent imminent injury to persons, severe damage to equipment, substantial loss of capital investment, or loss of product or raw material of substantial economic value.

Any operations shall continue no longer than the minimum time required to prevent the situations identified in (g)(2)(B) of this condition.

B.15 Deviations from Permit Requirements and Conditions [326 IAC 2-8-4(3)(C)(ii)]

- (a) Deviations from any permit requirements (for emergencies see Section B - Emergency Provision), the probable cause of such deviations, and any response steps or preventive measures taken shall be reported to:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

using the attached Quarterly Deviation and Compliance Monitoring Report, or its equivalent. Deviations that are required to be reported by an applicable requirement shall be reported according to the schedule stated in the applicable requirement and do not need to be included in this report.

The notification by the Permittee does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (b) A deviation is an exceedance of a permit limitation or a failure to comply with a requirement of the permit or a rule. It does not include:
- (1) An excursion from compliance monitoring parameters as identified in Section D of this permit unless tied to an applicable rule or limit; or
 - (2) Failure to implement elements of the Preventive Maintenance Plan unless such failure has caused or contributed to a deviation.

A Permittee's failure to take the appropriate response step when an excursion of a compliance monitoring parameter has occurred is a deviation.

- (c) Emergencies shall be included in the Quarterly Deviation and Compliance Monitoring Report.

**B.16 Permit Modification, Reopening, Revocation and Reissuance, or Termination
[326 IAC 2-8-4(5)(C)] [326 IAC 2-8-7(a)] [326 IAC 2-8-8]**

- (a) This permit may be modified, reopened, revoked and reissued, or terminated for cause. The filing of a request by the Permittee for a FESOP modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any condition of this permit. [326 IAC 2-8-4(5)(C)] The notification by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (b) This permit shall be reopened and revised under any of the circumstances listed in IC 13-15-7-2 or if IDEM, OAQ determines any of the following:
- (1) That this permit contains a material mistake.
 - (2) That inaccurate statements were made in establishing the emissions standards or

other terms or conditions.

- (3) That this permit must be revised or revoked to assure compliance with an applicable requirement. [326 IAC 2-8-8(a)]
- (c) Proceedings by IDEM, OAQ, to reopen and revise this permit shall follow the same procedures as apply to initial permit issuance and shall affect only those parts of this permit for which cause to reopen exists. Such reopening and revision shall be made as expeditiously as practicable. [326 IAC 2-8-8(b)]
- (d) The reopening and revision of this permit, under 326 IAC 2-8-8(a), shall not be initiated before notice of such intent is provided to the Permittee by IDEM, OAQ, at least thirty (30) days in advance of the date this permit is to be reopened, except that IDEM, OAQ, may provide a shorter time period in the case of an emergency. [326 IAC 2-8-8(c)]

B.17 Permit Renewal [326 IAC 2-8-3(h)]

- (a) The application for renewal shall be submitted using the application form or forms prescribed by IDEM, OAQ and shall include the information specified in 326 IAC 2-8-3. Such information shall be included in the application for each emission unit at this source, except those emission units included on the trivial or insignificant activities list contained in 326 IAC 2-7-1(21) and 326 IAC 2-7-1(40). The renewal application does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

Request for renewal shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, IN 46206-6015

- (b) Timely Submittal of Permit Renewal [326 IAC 2-8-3]
 - (1) A timely renewal application is one that is:
 - (A) Submitted at least nine (9) months prior to the date of the expiration of this permit; and
 - (B) If the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ, on or before the date it is due.
 - (2) If IDEM, OAQ upon receiving a timely and complete permit application, fails to issue or deny the permit renewal prior to the expiration date of this permit, this existing permit shall not expire and all terms and conditions shall continue in effect until the renewal permit has been issued or denied.
- (c) Right to Operate After Application for Renewal [326 IAC 2-8-9]

If the Permittee submits a timely and complete application for renewal of this permit, the source's failure to have a permit is not a violation of 326 IAC 2-8 until IDEM, OAQ takes final action on the renewal application, except that this protection shall cease to apply if, subsequent to the completeness determination, the Permittee fails to submit by the deadline specified in writing by IDEM, OAQ, any additional information identified as needed

to process the application.

B.18 Permit Amendment or Revision [326 IAC 2-8-10] [326 IAC 2-8-11.1]

- (a) Permit amendments and revisions are governed by the requirements of 326 IAC 2-8-10 or 326 IAC 2-8-11.1 whenever the Permittee seeks to amend or modify this permit.
- (b) Any application requesting an amendment or modification of this permit shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

Any such application should be certified by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (c) The Permittee may implement the administrative amendment changes addressed in the request for an administrative amendment immediately upon submittal of the request. [326 IAC 2-8-10(b)(3)]

B.19 Operational Flexibility [326 IAC 2-8-15]

- (a) The Permittee may make any change or changes at this source that are described in 326 IAC 2-8-15(b) through (d), without prior permit revision, if each of the following conditions is met:
 - (1) The changes are not modifications under any provision of Title I of the Clean Air Act;
 - (2) Any approval required by 326 IAC 2-8-11.1 has been obtained;
 - (3) The changes do not result in emissions which exceed the emissions allowable under this permit (whether expressed herein as a rate of emissions or in terms of total emissions);
 - (4) The Permittee notifies the:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

and

United States Environmental Protection Agency, Region V
Air and Radiation Division, Regulation Development Branch - Indiana (AR-18J)
77 West Jackson Boulevard
Chicago, Illinois 60604-3590

in advance of the change by written notification at least ten (10) days in advance of the proposed change. The Permittee shall attach every such notice to the Permittee's copy of this permit; and
 - (5) The Permittee maintains records on-site which document, on a rolling five (5) year basis, all such changes and emissions trading that are subject to 326 IAC 2-8-15(b) through (d) and makes such records available, upon reasonable request, to

public review.

Such records shall consist of all information required to be submitted to IDEM, OAQ, in the notices specified in 326 IAC 2-8-15(b), (c)(1), and (d).

- (b) The Permittee may make Section 502(b)(10) of the Clean Air Act changes (this term is defined at 326 IAC 2-7-1(36)) without a permit revision, subject to the constraint of 326 IAC 2-8-15(a) and the following additional conditions:

- (1) A brief description of the change within the source;
- (2) The date on which the change will occur;
- (3) Any change in emissions; and
- (4) Any permit term or condition that is no longer applicable as a result of the change.

The notification which shall be submitted by the Permittee does not require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1.

- (c) **Emission Trades** [326 IAC 2-8-15(c)]
The Permittee may trade increases and decreases in emissions in the source, where the applicable SIP provides for such emission trades without requiring a permit revision, subject to the constraints of Section (a) of this condition and those in 326 IAC 2-8-15(c).
- (d) **Alternative Operating Scenarios** [326 IAC 2-8-15(d)]
The Permittee may make changes at the source within the range of alternative operating scenarios that are described in the terms and conditions of this permit in accordance with 326 IAC 2-8-4(7). No prior notification of IDEM, OAQ or U.S. EPA is required.

B.20 Permit Revision Requirement [326 IAC 2-8-11.1]

A modification, construction, or reconstruction is governed by 326 IAC 2 and 326 IAC 2-8-11.1.

B.21 Inspection and Entry [326 IAC 2-8-5(a)(2)] [IC 13-14-2-2]

Upon presentation of proper identification cards, credentials, and other documents as may be required by law, and subject to the Permittee's right under all applicable laws and regulations to assert that the information collected by the agency is confidential and entitled to be treated as such, the Permittee shall allow IDEM, OAQ, U.S. EPA, or an authorized representative to perform the following:

- (a) Enter upon the Permittee's premises where a FESOP source is located, or emissions related activity is conducted, or where records must be kept under the conditions of this permit;
- (b) Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit;
- (c) Inspect, at reasonable times, any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit;
- (d) Sample or monitor, at reasonable times, substances or parameters for the purpose of assuring compliance with this permit or applicable requirements; and

- (e) Utilize any photographic, recording, testing, monitoring, or other equipment for the purpose of assuring compliance with this permit or applicable requirements.

B.22 Transfer of Ownership or Operational Control [326 IAC 2-8-10]

- (a) The Permittee must comply with the requirements of 326 IAC 2-8-10 whenever the Permittee seeks to change the ownership or operational control of the source and no other change in the permit is necessary.
- (b) Any application requesting a change in the ownership or operational control of the source shall contain a written agreement containing a specific date for transfer of permit responsibility, coverage and liability between the current and new Permittee. The application shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

The application which shall be submitted by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (c) The Permittee may implement administrative amendment changes addressed in the request for an administrative amendment immediately upon submittal of the request. [326 IAC 2-8-11(b)(3)]

B.23 Annual Fee Payment [326 IAC 2-7-19] [326 IAC 2-8-4(6)] [326 IAC 2-8-16]

- (a) The Permittee shall pay annual fees to IDEM, OAQ, within thirty (30) calendar days of receipt of a billing. Pursuant 326 IAC 2-7-19(b), if the Permittee does not receive a bill from IDEM, OAQ the applicable fee is due April 1 of each year.
- (b) Failure to pay may result in administrative enforcement action, or revocation of this permit.
- (c) The Permittee may call the following telephone numbers: 1-800-451-6027 or 317-233-0425 (ask for OAQ, Technical Support and Modeling Section), to determine the appropriate permit fee.

SECTION C SOURCE OPERATION CONDITIONS

Entire Source

Emissions Limitations and Standards [326 IAC 2-8-4(1)]

C.1 Overall Source Limit [326 IAC 2-8]

The purpose of this permit is to limit this source's potential to emit to less than major source levels for the purpose of Section 502(a) of the Clean Air Act.

(a) Pursuant to 326 IAC 2-8:

- (1) The potential to emit any regulated pollutant, except particulate matter (PM), from the entire source shall be limited to less than one-hundred (100) tons per twelve (12) consecutive month period. This limitation shall also satisfy the requirements of 326 IAC 2-3 (Emission Offset);
- (2) The potential to emit any individual hazardous air pollutant (HAP) from the entire source shall be limited to less than ten (10) tons per twelve (12) consecutive month period; and
- (3) The potential to emit any combination of HAPs from the entire source shall be limited to less than twenty-five (25) tons per twelve (12) consecutive month period.

(b) Pursuant to 326 IAC 2-2 (Prevention of Significant Deterioration (PSD)), emissions of particulate matter (PM) from the entire source shall be limited to less than two hundred fifty (250) tons per twelve (12) consecutive month period.

(c) This condition shall include all emission points at this source including those that are insignificant as defined in 326 IAC 2-7-1(21). The source shall be allowed to add insignificant activities not already listed in this permit, provided the source's potential to emit does not exceed the above specified limits.

(d) Section D of this permit contains independently enforceable provisions to satisfy this requirement.

C.2 Opacity [326 IAC 5-1]

Pursuant to 326 IAC 5-1-2 (Opacity Limitations), except as provided in 326 IAC 5-1-3 (Temporary Alternative Opacity Limitations), opacity shall meet the following, unless otherwise stated in this permit:

- (a) Opacity shall not exceed an average of forty percent (40%) in any one (1) six (6) minute averaging period as determined in 326 IAC 5-1-4.
- (b) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of fifteen (15) minutes (sixty (60) readings as measured according to 40 CFR 60, Appendix A, Method 9 or fifteen (15) one (1) minute nonoverlapping integrated averages for a continuous opacity monitor) in a six (6) hour period.

C.3 Open Burning [326 IAC 4-1] [IC 13-17-9]

The Permittee shall not open burn any material except as provided in 326 IAC 4-1-3, 326 IAC 4-1-4 or 326 IAC 4-1-6. The previous sentence notwithstanding, the Permittee may open burn in accordance with an open burning approval issued by the Commissioner under 326 IAC 4-1-4.1. 326 IAC 4-1-3(a)(2)(A) and (B) are not federally enforceable.

C.4 Incineration [326 IAC 4-2] [326 IAC 9-1-2(3)]

The Permittee shall not operate an incinerator or incinerate any waste or refuse except as provided in 326 IAC 4-2 and in 326 IAC 9-1-2. 326 IAC 9-1-2 is not federally enforceable.

C.5 Fugitive Dust Emissions [326 IAC 6-4]

The Permittee shall not allow fugitive dust to escape beyond the property line or boundaries of the property, right-of-way, or easement on which the source is located, in a manner that would violate 326 IAC 6-4 (Fugitive Dust Emissions). 326 IAC 6-4-2(4) is not federally enforceable.

C.6 Operation of Equipment [326 IAC 2-8-5(a)(4)]

Except as otherwise provided by statute, rule, or in this permit, all air pollution control equipment listed in this permit and used to comply with an applicable requirement shall be operated at all times that the emission units vented to the control equipment are in operation.

C.7 Stack Height [326 IAC 1-7]

The Permittee shall comply with the applicable provisions of 326 IAC 1-7 (Stack Height Provisions), for all exhaust stacks through which a potential (before controls) of twenty-five (25) tons per year or more of particulate matter or sulfur dioxide is emitted. The provisions of 326 IAC 1-7-2, 326 IAC 1-7-3(c) and (d), 326 IAC 1-7-4(d)(3), (e), and (f), and 326 IAC 1-7-5(d) are not federally enforceable.

C.8 Asbestos Abatement Projects [326 IAC 14-10] [326 IAC 18] [40 CFR 61, Subpart M]

- (a) Notification requirements apply to each owner or operator. If the combined amount of regulated asbestos containing material (RACM) to be stripped, removed or disturbed is at least 260 linear feet on pipes or 160 square feet on other facility components, or at least thirty-five (35) cubic feet on all facility components, then the notification requirements of 326 IAC 14-10-3 are mandatory. All demolition projects require notification whether or not asbestos is present.
- (b) The Permittee shall ensure that a written notification is sent on a form provided by the Commissioner at least ten (10) working days before asbestos stripping or removal work or before demolition begins, per 326 IAC 14-10-3, and shall update such notice as necessary, including, but not limited to the following:
 - (1) When the amount of affected asbestos containing material increases or decreases by at least twenty percent (20%); or
 - (2) If there is a change in the following:
 - (A) Asbestos removal or demolition start date;
 - (B) Removal or demolition contractor; or
 - (C) Waste disposal site.
- (c) The Permittee shall ensure that the notice is postmarked or delivered according to the guidelines set forth in 326 IAC 14-10-3(2).
- (d) The notice to be submitted shall include the information enumerated in 326 IAC 14-10-3(3).

All required notifications shall be submitted to:

Indiana Department of Environmental Management
Asbestos Section, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

The notifications do not require a certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (e) **Procedures for Asbestos Emission Control**
The Permittee shall comply with the applicable emission control procedures in 326 IAC 14-10-4 and 40 CFR 61.145(c). Per 326 IAC 14-10-4 emission control requirements are applicable for any removal or disturbance of RACM greater than three (3) linear feet on pipes or three (3) square feet on any other facility components or a total of at least 0.75 cubic feet on all facility components.
- (f) **Indiana Accredited Asbestos Inspector**
The Permittee shall comply with 326 IAC 14-10-1(a) that requires the owner or operator, prior to a renovation/demolition, to use an Indiana Accredited Asbestos Inspector to thoroughly inspect the affected portion of the facility for the presence of asbestos. The requirement that the inspector be accredited is federally enforceable.

Testing Requirements [326 IAC 2-8-4(3)]

C.9 Performance Testing [326 IAC 3-6]

- (a) All testing shall be performed according to the provisions of 326 IAC 3-6 (Source Sampling Procedures), except as provided elsewhere in this permit, utilizing any applicable procedures and analysis methods specified in 40 CFR 51, 40 CFR 60, 40 CFR 61, 40 CFR 63, 40 CFR 75, or other procedures approved by IDEM, OAQ.

A test protocol, except as provided elsewhere in this permit, shall be submitted to:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

no later than thirty-five (35) days prior to the intended test date. The protocol submitted by the Permittee does not require certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (b) The Permittee shall notify IDEM, OAQ of the actual test date at least fourteen (14) days prior to the actual test date. The notification submitted by the Permittee does not require certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (c) Pursuant to 326 IAC 3-6-4(b), all test reports must be received by IDEM, OAQ not later than forty-five (45) days after the completion of the testing. An extension may be granted by IDEM, OAQ, if the source submits to IDEM, OAQ, a reasonable written explanation not later than five (5) days prior to the end of the initial forty-five (45) day period.

Compliance Requirements [326 IAC 2-1.1-11]

C.10 Compliance Requirements [326 IAC 2-1.1-11]

The commissioner may require stack testing, monitoring, or reporting at any time to assure compliance with all applicable requirements. Any monitoring or testing shall be performed in accordance with 326 IAC 3 or other methods approved by the commissioner or the U. S. EPA.

Compliance Monitoring Requirements [326 IAC 2-8-4] [326 IAC 2-8-5(a)(1)]

C.11 Compliance Monitoring [326 IAC 2-8-4(3)] [326 IAC 2-8-5(a)(1)]

Unless otherwise specified in this permit, all monitoring and record keeping requirements not already legally required shall be implemented within ninety (90) days of permit issuance. If required by Section D, the Permittee shall be responsible for installing any necessary equipment and initiating any required monitoring related to that equipment. If due to circumstances beyond its control, that equipment cannot be installed and operated within ninety (90) days, the Permittee may extend the compliance schedule related to the equipment for an additional ninety (90) days provided the Permittee notifies:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

in writing, prior to the end of the initial ninety (90) day compliance schedule with full justification of the reasons for inability to meet this date.

The notification which shall be submitted by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

Unless otherwise specified in the approval for the new emission unit(s), compliance monitoring for new emission units or emission units added through a permit revision shall be implemented when operation begins.

C.12 Maintenance of Emission Monitoring Equipment [326 IAC 2-8-4(3)(A)(iii)]

- (a) In the event that a breakdown of the emission monitoring equipment occurs, a record shall be made of the times and reasons of the breakdown and efforts made to correct the problem. To the extent practicable, supplemental or intermittent monitoring of the parameter should be implemented at intervals no less frequent than required in Section D of this permit until such time as the monitoring equipment is back in operation. In the case of continuous monitoring, supplemental or intermittent monitoring of the parameter should be implemented at intervals no less often than once an hour until such time as the continuous monitor is back in operation.
- (b) The Permittee shall install, calibrate, quality assure, maintain, and operate all necessary monitors and related equipment. In addition, prompt corrective action shall be initiated whenever indicated.

C.13 Monitoring Methods [326 IAC 3] [40 CFR 60] [40 CFR 63]

Any monitoring or testing performed required by Section D of this permit shall be performed according to the provisions of 326 IAC 3, 40 CFR 60, Appendix A, 40 CFR 60 Appendix B, 40 CFR 63 or other approved methods as specified in this permit.

C.14 Pressure Gauge and Other Instrument Specifications [326 IAC 2-1.1-11] [326 IAC 2-8-4(3)] [326 IAC 2-8-5(1)]

- (a) Whenever a condition in this permit requires the measurement of pressure drop across any part of the unit or its control device, the gauge employed shall have a scale such that the expected normal reading shall be no less than twenty percent (20%) of full scale and be accurate within plus or minus two percent ($\pm 2\%$) of full scale reading.
- (b) The Permittee may request the IDEM, OAQ approve the use of a pressure gauge or other instrument that does not meet the above specifications provided the Permittee can demonstrate an alternative pressure gauge or other instrument specification will adequately

ensure compliance with permit conditions requiring the measurement of pressure drop or other parameters.

Corrective Actions and Response Steps [326 IAC 2-8-4] [326 IAC 2-8-5(a)(1)]

C.15 Emergency Reduction Plans [326 IAC 1-5-2] [326 IAC 1-5-3]

Pursuant to 326 IAC 1-5-2 (Emergency Reduction Plans; Submission):

- (a) The Permittee shall prepare written emergency reduction plans (ERPs) consistent with safe operating procedures.

- (b) These ERPs shall be submitted for approval to:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

within ninety (90) days from the date of issuance of this permit.

The ERP does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (c) If the ERP is disapproved by IDEM, OAQ, the Permittee shall have an additional thirty (30) days to resolve the differences and submit an approvable ERP.
- (d) These ERPs shall state those actions that will be taken, when each episode level is declared, to reduce or eliminate emissions of the appropriate air pollutants.
- (e) Said ERPs shall also identify the sources of air pollutants, the approximate amount of reduction of the pollutants, and a brief description of the manner in which the reduction will be achieved.
- (f) Upon direct notification by IDEM, OAQ, that a specific air pollution episode level is in effect, the Permittee shall immediately put into effect the actions stipulated in the approved ERP for the appropriate episode level. [326 IAC 1-5-3]

C.16 Risk Management Plan [326 IAC 2-8-4] [40 CFR 68.215]

If a regulated substance, subject to 40 CFR 68, is present at a source in more than a threshold quantity, 40 CFR 68 is an applicable requirement and the Permittee shall submit:

- (a) A compliance schedule for meeting the requirements of 40 CFR 68; or
- (b) As a part of the annual compliance certification submitted under 326 IAC 2-7-6(5), a certification statement that the source is in compliance with all the requirements of 40 CFR 68, including the registration and submission of a Risk Management Plan (RMP);

All documents submitted pursuant to this condition shall include the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

C.17 Compliance Monitoring Plan - Failure to Take Response Steps [326 IAC 2-8-4] [326 IAC 2-8-5]

- (a) The Permittee is required to implement a compliance monitoring plan to ensure that reasonable information is available to evaluate its continuous compliance with applicable requirements. The compliance monitoring plan can be either an entirely new document, consist in whole of information contained in other documents, or consist of a combination

of new information and information contained in other documents. If the compliance monitoring plan incorporates by reference information contained in other documents, the Permittee shall identify as part of the compliance monitoring plan the documents in which the information is found. The elements of the compliance monitoring plan are:

- (1) This condition;
 - (2) The Compliance Determination Requirements in Section D of this permit;
 - (3) The Compliance Monitoring Requirements in Section D of this permit;
 - (4) The Record Keeping and Reporting Requirements in Section C (Monitoring Data Availability, General Record Keeping Requirements, and General Reporting Requirements) and in Section D of this permit; and
 - (5) A Compliance Response Plan (CRP) for each compliance monitoring condition of this permit. CRP's shall be submitted to IDEM, OAQ upon request and shall be subject to review and approval by IDEM, OAQ. The CRP shall be prepared within ninety (90) days after issuance of this permit by the Permittee and maintained on site, and is comprised of:
 - (A) Reasonable response steps that may be implemented in the event that compliance related information indicates that a response step is needed pursuant to the requirements of Section D of this permit; and
 - (B) A time schedule for taking reasonable response steps including a schedule for devising additional response steps for situations that may not have been predicted.
- (b) For each compliance monitoring condition of this permit, reasonable response steps shall be taken when indicated by the provisions of that compliance monitoring condition. Failure to take reasonable response steps may constitute a violation of the permit.
- (c) Upon investigation of a compliance monitoring excursion, the Permittee is excused from taking further response steps for any of the following reasons:
- (1) A false reading occurs due to the malfunction of the monitoring equipment. This shall be an excuse from taking further response steps providing that prompt action was taken to correct the monitoring equipment.
 - (2) The Permittee has determined that the compliance monitoring parameters established in the permit conditions are technically inappropriate, has previously submitted a request for an administrative amendment to the permit, and such request has not been denied;
 - (3) An automatic measurement was taken when the process was not operating;
 - (4) The process has already returned or is returning to operating within "normal" parameters and no response steps are required.
- (d) Records shall be kept of all instances in which the compliance related information was not met and of all response steps taken. In the event of an emergency, the provisions of 326 IAC 2-7-16 (Emergency Provisions) requiring prompt corrective action to mitigate emissions shall prevail.
- (e) All monitoring required in Section D shall be performed at all times the equipment is

operating. If monitoring is required by Section D and the equipment is not operating, then the Permittee may record the fact that the equipment is not operating or perform the required monitoring.

- (f) At its discretion, IDEM may excuse the Permittee's failure to perform the monitoring and record keeping as required by Section D, if the Permittee provides adequate justification and documents that such failures do not exceed five percent (5%) of the operating time in any quarter. Temporary, unscheduled unavailability of qualified staff shall be considered a valid reason for failure to perform the monitoring or record keeping requirements in Section D.

**C.18 Actions Related to Noncompliance Demonstrated by a Stack Test [326 IAC 2-8-4]
[326 IAC 2-8-5]**

- (a) When the results of a stack test performed in conformance with Section C - Performance Testing, of this permit exceed the level specified in any condition of this permit, the Permittee shall take appropriate response actions. The Permittee shall submit a description of these response actions to IDEM, OAQ, within thirty (30) days of receipt of the test results. The Permittee shall take appropriate action to minimize excess emissions from the affected facility while the response actions are being implemented.
- (b) A retest to demonstrate compliance shall be performed within one hundred twenty (120) days of receipt of the original test results. Should the Permittee demonstrate to IDEM, OAQ that retesting in one-hundred and twenty (120) days is not practicable, IDEM, OAQ may extend the retesting deadline.
- (c) IDEM, OAQ reserves the authority to take any actions allowed under law in response to noncompliant stack tests.

The documents submitted pursuant to this condition do not require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

C.19 General Record Keeping Requirements [326 IAC 2-8-4(3)] [326 IAC 2-8-5]

- (a) Records of all required data, reports and support information shall be retained for a period of at least five (5) years from the date of monitoring sample, measurement, report, or application. These records shall be kept at the source location for a minimum of three (3) years. The records may be stored elsewhere for the remaining two (2) years as long as they are available upon request. If the Commissioner makes a request for records to the Permittee, the Permittee shall furnish the records to the Commissioner within a reasonable time.
- (b) Unless otherwise specified in this permit, all record keeping requirements not already legally required shall be implemented within ninety (90) days of permit issuance.

C.20 General Reporting Requirements [326 IAC 2-8-4(3)(C)] [326 IAC 2-1.1-11]

- (a) The source shall submit the attached Quarterly Deviation and Compliance Monitoring Report or its equivalent. Any deviation from permit requirements, and the date(s) of each deviation, the cause of the deviation, and the response steps taken must be reported. This report shall be submitted within thirty (30) days of the end of the reporting period. The Quarterly Deviation and Compliance Monitoring Report shall include the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (b) The report required in (a) of this condition and reports required by conditions in Section D of

this permit shall be submitted to:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

- (c) Unless otherwise specified in this permit, any notice, report, or other submission required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ, on or before the date it is due.
- (d) Unless otherwise specified in this permit, any quarterly report required in Section D of this permit shall be submitted within thirty (30) days of the end of the reporting period. The report does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (e) The first report shall cover the period commencing on the date of issuance of this permit and ending on the last day of the reporting period. Reporting periods are based on calendar years.

Stratospheric Ozone Protection

C.21 Compliance with 40 CFR 82 and 326 IAC 22-1

Pursuant to 40 CFR 82 (Protection of Stratospheric Ozone), Subpart F, except as provided for motor vehicle air conditioners in Subpart B, the Permittee shall comply with the standards for recycling and emissions reduction:

- (a) Persons opening appliances for maintenance, service, repair or disposal must comply with the required practices pursuant to 40 CFR 82.156
- (b) Equipment used during the maintenance, service, repair or disposal of appliances must comply with the standards for recycling and recovery equipment pursuant to 40 CFR 82.158.
- (c) Persons performing maintenance, service, repair or disposal of appliances must be certified by an approved technician certification program pursuant to 40 CFR 82.161.

SECTION D.1

FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-8-4(10)]:

- (a) one (1) Coal bulk unloading, handling and storage operation, with a maximum capacity of 48 tons per hour (TPH), using a baghouse (BH-13) for PM and PM10 control, and exhausting to a point designated as DC-6, inside the building;
- (b) one (1) Coal milling operation, with a maximum capacity of 10 TPH, using a baghouse (BH-14) for PM and PM10 control, and exhausting to a point designated as DC-1, inside the building;
- (c) one (1) Coal screening operation, with a maximum capacity of 10 TPH, using a baghouse (BH-15) for PM and PM10 control, and exhausting to a point designated as DC-7, inside the building;
- (d) one (1) Raw materials unloading operation, with a maximum capacity of 32 TPH, using a baghouse (BH-01) for PM and PM10 control, and exhausting inside the building;
- (e) one (1) Raw materials storage tank identified as Tank A, with a maximum capacity of 32 TPH, using a baghouse (BH-02) for PM and PM10 control, and exhausting to a point designated as BV-A, inside the building;
- (f) one (1) Raw materials storage tank identified as Tank C, with a maximum capacity of 32 TPH, using a baghouse (BH-03) for PM and PM10 control, and exhausting to a point designated as BV-C, inside the building;
- (g) one (1) Raw materials storage tank identified as Tank B&D, with a maximum capacity of 32 TPH, using a baghouse (BH-04) for PM and PM10 control, and exhausting to a point designated as BV-BD, inside the building;
- (h) one (1) Elevator Conveyor identified as # 1, with a maximum capacity of 35 TPH, using a baghouse (BH-17) for PM and PM10 control, and exhausting inside the building;
- (i) one (1) Elevator Conveyor identified as # 2, with a maximum capacity of 35 TPH, using a baghouse (BH-18) for PM and PM10 control, and exhausting inside the building;
- (j) one (1) Blender/Lump breaker operation, with a maximum capacity of 35 TPH, using a baghouse (BH-05) for PM and PM10 control, and exhausting to a point designated as DC-4 inside the building;
- (k) one (1) Materials transfer operation, with a maximum capacity of 35 TPH, using a baghouse (BH-12) for PM and PM10 control, and exhausting inside the building;
- (l) one (1) Blender elevator, with a maximum capacity of 35 TPH, using a baghouse (BH-06) for PM and PM10 control, and exhausting to a point designated as BV-3, inside the building;

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Facility Description [326 IAC 2-8-4(10)]:

- (m) one (1) Outbound storage tank, with a maximum capacity of 35 TPH, using a baghouse (BH-789) for PM and PM10 control, and exhausting inside the building;
- (n) one (1) Product loadout operation, with a maximum capacity of 100 TPH, using a baghouse (BH-10) for PM and PM10 control, and exhausting to a point designated as DC-3, inside the building; and
- (o) one (1) Packaging operation, with a maximum capacity of 7 TPH, using a baghouse (BH-11) for PM and PM10 control, and exhausting inside the building.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-8-4(1)]

D.1.1 General Provisions Relating to NSPS [326 IAC 12-1] [40 CFR 60, Subpart Y]

Pursuant to the New Source Performance Standards, 326 IAC 12, and 40 CFR 60.250 through 60.254, Subpart Y. Permittee shall not cause to be discharged into the atmosphere from any coal processing and conveying equipment, coal storage system, or coal transfer and loading system, processing coal gases which exhibit 20 percent opacity or greater.

D.1.2 General Provisions Relating to NSPS [326 IAC 12-1] [40 CFR 60, Subpart OOO]

Pursuant to the New Source Performance Standards, 326 IAC 12 and 40 CFR 60.670 through 60.676, Subpart OOO, the permittee shall control particulate emissions from:

- (1) Exhausts DC-5, BV-A, BV-C, BV-BD, BV-1, BV-2, DC-04, DC-08, BV-3, BV-04, DC-3, and DC-2 shall be limited to:
 - (A) 0.05 g/dscm; and
 - (B) 7 percent opacity
- (2) Transfer points fugitive emissions shall be limited to 10% opacity.

D.1.3 Particulate Matter (PM) [326 IAC 6-3-2]

Pursuant to 326 IAC 6-3-2 (Process Operations), particulate emissions from the following facilities shall be limited as follows:

Interpolation and extrapolation of the data for the process weight rate in excess of sixty thousand (60,000) pounds per hour shall be accomplished by use of the equation:

$$E = 55.0 P^{0.11} - 40$$

where E = rate of emission in pounds per hour and
P = process weight rate in tons per hour

Interpolation of the data for the process weight rate up to sixty thousand (60,000) pounds per hour shall be accomplished by use of the equation:

$$E = 4.10 P^{0.67}$$

where E = rate of emission in pounds per hour and
P = process weight rate in tons per hour

Emission Unit	Process Weight Rate (tons/hr)	Allowable PM Emissions 326 IAC 6-3-2 (lb/hr)
Coal unloading, handling and storage operation (DC-6)	48	44.2
Coal milling operation (DC-1)	32	19.1
Coal screening operation (DC-7)	32	19.1
Raw materials unloading operation (DC-5)	32	40.5
Raw materials storage tank A (BV-A)	32	40.5
Raw materials storage tank C (BV-C)	32	40.5
Raw materials storage tank B&D (BV-BD)	32	40.5
Elevator conveyer # 1 (BV-1)	35	41.3
Elevator conveyer # 2 (BV-2)	35	41.3
Blender/lump breaker operation (DC-4)	35	41.3
Materials transfer operation (DC-8)	35	41.3
Blender elevator (BV-3)	35	41.3
Outbound storage tanks (BV-4)	35	41.3
Product loadout operation (DC-3)	100	51.3
Packaging operation (DC-2)	7	15.1
Total (lb/hr)		558.6

D.1.4 PSD [326 IAC 2-2]

Pursuant to 326 IAC 2-2 (PSD), the source will limit PM emissions to less than 250 tons per year and will render 326 IAC 2-2 (PSD) not applicable. The source will be in compliance with the limitation by controlling PM emissions with baghouses. PM emissions are limited as follows:

Emission Unit	Allowable PM Emissions (lb/hr)
Coal unloading, handling and storage operation (DC-6)	29.25 (1)
Coal milling operation (DC-1)	12.64 (1)
Coal screening operation (DC-7)	12.64 (1)
Raw materials unloading operation (DC-5)	0.41 (2)
Raw materials storage tank A (BV-A)	0.17 (2)
Raw materials storage tank C (BV-C)	0.17 (2)
Raw materials storage tank B&D (BV-BD)	0.17 (2)
Elevator conveyer # 1 (BV-1)	0.10 (2)
Elevator conveyer # 2 (BV-2)	0.10 (2)
Blender/lump breaker operation (DC-4)	0.17 (2)
Materials transfer operation (DC-8)	0.20 (2)
Blender elevator (BV-3)	0.10 (2)
Outbound storage tanks (BV-4)	0.15 (2)
Product loadout operation (DC-3)	0.17 (2)
Packaging operation (DC-2)	0.41 (2)
Total (lb/hr)	56.85

Note: (1) PM allowable emissions for these facilities are truncated from 326 IAC (6-3-2) allowable PM emissions, such that the source wide PM emissions are less than 250 tons/yr to ensure that the requirements of 326 IAC 2-2 (PSD) do not apply.
(2) PM allowable emissions based on 40 CFR 60.670 Subpart OOO PM emission limit of 0.022 gr/dscf.

D.1.5 FESOP PM10 limit [326 IAC 2-8-4]

Pursuant to 326 IAC 2-8-4 (FESOP), the source will limit PM10 emissions to less than 100 tons per year and will render 326 IAC 2-7 (Part 70 Permit Program) not applicable. The source will be in compliance with the limitation by controlling PM10 emissions with baghouses. PM10 emissions are limited as follows:

Emission Unit	Allowable PM-10 Emissions (lb/hr)
Coal unloading, handling and storage operation (DC-6)	10.87 (3)
Coal milling operation (DC-1)	4.70 (3)
Coal screening operation (DC-7)	4.70 (3)
Raw materials unloading operation (DC-5)	0.41
Raw materials storage tank A (BV-A)	0.17
Raw materials storage tank C (BV-C)	0.17
Raw materials storage tank B&D (BV-BD)	0.17
Elevator conveyer # 1 (BV-1)	0.10
Elevator conveyer # 2 (BV-2)	0.10
Blender/lump breaker operation (DC-4)	0.17
Materials transfer operation (DC-8)	0.20
Blender elevator (BV-3)	0.10
Outbound storage tanks (BV-4)	0.15
Product loadout operation (DC-3)	0.17
Packaging operation (DC-2)	0.41
Total (lb/hr)	22.59

(3) PM10 allowable emissions for these facilities are truncated, such that the source wide PM10 emission is less than 100 tons/yr to ensure that the requirements of 326 IAC 2-7 (Part 70 Permit Program) do not apply.

D.1.6 Preventive Maintenance Plan [326 IAC 2-8-4(9)]

A Preventive Maintenance Plan, in accordance with Section B - Preventive Maintenance Plan, of this permit, is required for coal bulk unloading, handling and storage, coal milling, coal screening, raw materials storage and unloading, blender/lump breaker, materials transfer, elevator conveyers (#1 and # 2), blender elevator, outbound storage tank, product loadout and packaging facilities and its control devices.

Compliance Determination Requirements

D.1.7 Particulate Matter (PM) and (PM10)

The baghouses for PM and PM10 control shall be in operation at all times that the coal bulk unloading, handling and storage, coal milling, coal screening, raw materials storage and unloading, blender/lump breaker, materials transfer, elevator conveyers (#1 and # 2), blender elevator, outbound storage tank, product loadout and packaging facilities are in operation.

D.1.8 Testing Requirements [326 IAC 2-1.1-11]

The OAQ will not require testing of units while exhausting inside the building. However, units shall be tested to demonstrate compliance with condition D.1.4 within six (6) months of being redirected to venting to the atmosphere. The Permittee shall perform PM testing utilizing methods approved by the commissioner. This test shall be repeated at least once every five (5) years from the date of this valid compliance demonstration.

Compliance Monitoring Requirements [326 IAC 2-8-4] [326 IAC 2-8-5(a)(1)]

D.1.9 Parametric Monitoring

The Permittee shall record the total static pressure drop across the baghouse used in conjunction with the operations, at least once per working shift when the coal bulk unloading, raw materials storage and unloading, blender/lump breaker, materials transfer, elevator conveyor, blender elevator, outbound storage tank and product loadout facilities are in operation when venting to the atmosphere. Unless operated under conditions for which the Compliance Response Plan specifies otherwise, the pressure drop across the baghouse shall be maintained within the range of 3.0 and 6.0 inches of water or a range established during the latest stack test. The Compliance Response Plan for this unit shall contain troubleshooting contingency and response steps for when the pressure reading is outside of the above mentioned range for any one reading. Failure to take response steps in accordance with Section C - Compliance Monitoring Plan - Failure to Take Response Steps, shall be considered a violation of this permit.

The instrument used for determining the pressure shall comply with Section C - Pressure Gauge and Other Instrument Specifications, of this permit, shall be subject to approval by IDEM, OAQ, and shall be calibrated at least once every six (6) months.

D.1.10 Baghouse Inspections

An inspection shall be performed each calendar quarter of all bags controlling the coal bulk unloading, handling and storage, coal milling, coal screening, raw materials storage and unloading, blender/lump breaker, materials transfer, elevator conveyers (#1 and # 2), blender elevator, outbound storage tank, product loadout and packaging when venting to the atmosphere. A baghouse inspection shall be performed within three months of redirecting vents to the atmosphere and every three months thereafter. Inspections are optional when venting indoors. All defective bags shall be replaced.

D.1.11 Broken or Failed Bag Detection

In the event that bag failure has been observed:

- (a) For multi-compartment units, the affected compartments will be shut down immediately until the failed units have been repaired or replaced. Operations may continue only if there are no visible emissions or if the event qualifies as an emergency and the Permittee satisfies the emergency provisions of this permit (Section B- Emergency Provisions). Within eight (8) business hours of the determination of failure, response steps according to the timetable described in the Compliance Response Plan shall be initiated. For any failure with corresponding response steps and timetable not described in the Compliance Response Plan, response steps shall be devised within eight (8) business hours of discovery of the failure and shall include a timetable for completion. Failure to take response steps in accordance with Section C - Compliance Monitoring Plan - Failure to Take Response Steps, shall be considered a violation of this permit.
- (b) For single compartment baghouses, failed units and the associated process will be shut down immediately until the failed units have been repaired or replaced. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions).

Record Keeping and Reporting Requirement [326 IAC 2-8-4(3)] [326 IAC 2-8-16]

D.1.12 Record Keeping Requirements

- (a) To document compliance with Condition D.1.9, the Permittee shall maintain the following:
 - (1) Once per shift records of the following operational parameters during normal operation when venting to the atmosphere:
 - (A) Inlet and outlet differential static pressure; and
 - (B) Cleaning cycle operation.
 - (2) Documentation of the dates vents are redirected.
- (b) To document compliance with Condition D.1.10, the Permittee shall maintain records of the results of the inspections required under Condition D.1.10 and the dates the vents are redirected.
- (c) All records shall be maintained in accordance with Section C - General Record Keeping Requirements, of this permit.

Indiana Department of Environmental Management Office of Air Quality

Technical Support Document (TSD) for a Minor Permit Revision to a Federally Enforceable Operating Permit (FESOP)

Source Background and Description

Source Name:	American Colloid Company
Source Location:	Tell City Industrial Park, Troy, IN 47588
County:	Perry
SIC Code:	3295
Operation Permit No.:	F123-12215-00021
Permit Revision No.:	123-18111-00021
Permit Reviewer:	Femi Ogunsola / EVP

The Office of Air Quality (OAQ) has reviewed a Minor Permit Revision to a Federally Enforceable State Operating Permit (FESOP). American Colloid Company operates a stationary commercial coal grinding and clay blending plant that manufactures additives.

History

On September 5, 2003, the Office of Air Quality (OAQ) received a letter informing OAQ of a proposal to modify the exhaust point locations of several emission units and requesting minor permit revisions to existing FESOP 123-12215-00021, issued on November 27, 2000.

There will be no change to the unrestricted potential to emit of any regulated pollutant, or to the source's applicability to any Federal or State Rule as stated in FESOP 123-12215-00021, due to the revisions. However, these revisions will result in change in the methods used to demonstrate or monitor compliance by eliminating the need for visible emission notations. Pursuant to 326 IAC 2-8-11.1(d)(1), the application is reviewed as a minor permit revision to existing FESOP.

This Technical Support Document reflects the changes consisting of modifications of the exhaust point locations of six emission units and revisions to the compliance requirements in FESOP 123-12215-00021 as follows:

Permitted Emission Units and Pollution Control Equipment

The source consists of the following permitted emission units and pollution control devices:

- (a) one (1) Coal bulk unloading, handling and storage operation, with a maximum capacity of 48 tons per hour (TPH), using a baghouse (BH-13) for PM and PM10 control, and exhausting to a point designated as DC-6, inside the building;
- (b) one (1) Coal milling operation, with a maximum capacity of 10 TPH, using a baghouse (BH-14) for PM and PM10 control, and exhausting to a point designated as DC-1, inside the building;
- (c) one (1) Coal screening operation, with a maximum capacity of 10 TPH, using a baghouse (BH-15) for PM and PM10 control, and exhausting to a point designated as DC-7, inside the building;

- (d) one (1) Raw materials unloading operation, with a maximum capacity of 32 TPH, using a baghouse (BH-01) for PM and PM10 control, and exhausting **inside the building**.
- (e) one (1) Raw materials storage tank identified as Tank A, with a maximum capacity of 32 TPH, using a baghouse (BH-02) for PM and PM10 control, and exhausting to a point designated as BV-A, inside the building;
- (f) one (1) Raw materials storage tank identified as Tank C, with a maximum capacity of 32 TPH, using a baghouse (BH-03) for PM and PM10 control, and exhausting to a point designated as BV-C, inside the building;
- (g) one (1) Raw materials storage tank identified as Tank B&D, with a maximum capacity of 32 TPH, using a baghouse (BH-04) for PM and PM10 control, and exhausting to a point designated as BV-BD, inside the building;
- (h) one (1) Elevator Conveyer identified as # 1, with a maximum capacity of 35 TPH, using a baghouse (BH-17) for PM and PM10 control, and exhausting **inside the building**;
- (i) one (1) Elevator Conveyer identified as # 2, with a maximum capacity of 35 TPH, using a baghouse (BH-18) for PM and PM10 control, and exhausting **inside the building**;
- (j) one (1) Blender/Lump breaker operation, with a maximum capacity of 35 TPH, using a baghouse (BH-05) for PM and PM10 control, and exhausting to a point designated as DC-4 inside the building;
- (k) one (1) Materials transfer operation, with a maximum capacity of 35 TPH, using a baghouse (BH-12) for PM and PM10 control, and exhausting **inside the building**;
- (l) one (1) Blender elevator, with a maximum capacity of 35 TPH, using a baghouse (BH-06) for PM and PM10 control, and exhausting to a point designated as BV-3, inside the building;
- (m) one (1) Outbound storage tank, with a maximum capacity of 35 TPH, using a baghouse (BH-789) for PM and PM10 control, and exhausting **inside the building**;
- (n) one (1) Product loadout operation, with a maximum capacity of 100 TPH, using a baghouse (BH-10) for PM and PM10 control, and exhausting to a point designated as DC-3, inside the building; and
- (o) one (1) Packaging operation, with a maximum capacity of 7 TPH, using a baghouse (BH-11) for PM and PM10 control, and exhausting **inside the building**.

Testing Requirements

The OAQ will not require testing of units while exhausting inside the building. However, units shall be tested to demonstrate compliance with condition D.1.4 within six (6) months of being redirected to venting to the atmosphere. The Permittee shall perform PM testing utilizing methods approved by the commissioner. This test shall be repeated at least once every five (5) years from the date of this valid compliance demonstration.

Compliance Requirements

Permits issued under 326 IAC 2-8 are required to ensure that sources can demonstrate compliance with applicable state and federal rules on a more or less continuous basis. All state and federal rules contain compliance provisions, however, these provisions do not always fulfill the requirement for a more or less continuous demonstration. When this occurs IDEM, OAM, in conjunction with the source, must develop specific conditions to satisfy 326 IAC 2-8-4. As a result, compliance requirements are divided into two sections: Compliance Determination Requirements and Compliance Monitoring Requirements.

Compliance Determination Requirements in Section D of the permit are those conditions that are found more or less directly within state and federal rules and the violation of which serves as grounds for enforcement action. If these conditions are not sufficient to demonstrate continuous compliance, they will be supplemented with Compliance Monitoring Requirements, also Section D of the permit. Unlike Compliance Determination Requirements, failure to meet Compliance Monitoring conditions would serve as a trigger for corrective actions and not grounds for enforcement action. However, a violation in relation to a compliance monitoring condition will arise through a source's failure to take the appropriate corrective actions within a specific time period.

The compliance monitoring requirements applicable to this source are as follows:

- (1) The coal bulk unloading, handling and storage, coal milling, coal screening, raw materials storage and unloading, blender/lump breaker, materials transfer, elevator conveyer, blender elevator, outbound storage tank, product loadout and packaging facilities have applicable compliance monitoring conditions as specified below:
 - (a) The baghouses for PM control shall be in operation at all times when the facilities are in operation.
 - (b) The Permittee shall record the total static pressure drop across each of the baghouses used in conjunction with the facilities, at least once per working shift when the coal bulk unloading, handling and storage, coal milling, coal screening, raw materials storage and unloading, blender/lump breaker, materials transfer, elevator conveyers, blender elevator, outbound storage tank, product loadout and packaging facilities are in operation when venting to the atmosphere. Unless operated under conditions for which the Compliance Response Plan specifies otherwise, the pressure drop across each of the baghouses shall be maintained within the range of 3.0 and 6.0 inches of water or a range established during the latest stack test. The Compliance Response Plan for this unit shall contain troubleshooting contingency and response steps for when the pressure reading is outside of the above mentioned range for any one reading.
 - (c) The instrument used for determining the pressure shall comply with Section C - Pressure Gauge Specifications, of this permit, shall be subject to approval by IDEM, OAM, and shall be calibrated at least once every six (6) months.
 - (d) An inspection shall be performed each calendar quarter of all bags controlling the operations when venting to the atmosphere. A baghouse inspection shall be performed within three months of redirecting vents to the atmosphere and every three months thereafter. Inspections are optional when venting to the indoors. All defective bags shall be replaced.

- (e) ~~Daily visible emission notations of the raw materials unloading (DC-5), materials transfer (DC-8), elevator conveyers (#1 (BV-1) and #2 (BV-2)), outbound storage tank (BV-4), and packaging (DC-2) facilities stack exhausts shall be performed during normal daylight operations when exhausting to the atmosphere. A trained employee shall record whether emissions are normal or abnormal. For processes operated continuously, "normal" means those conditions prevailing, or expected to prevail, eighty percent (80%) of the time the process is in operation, not counting startup or shut down time. In the case of batch or discontinuous operations, readings shall be taken during that part of the operation that would normally be expected to cause the greatest emissions. A trained employee is an employee who has worked at the plant at least one (1) month and has been trained in the appearance and characteristics of normal visible emissions for that specific process. The Compliance Response Plan for this unit shall contain troubleshooting contingency and response steps for when an abnormal emission is observed.~~

These monitoring requirements are necessary because the baghouses for the coal bulk unloading, handling and storage, coal milling, coal screening, raw materials storage and unloading, blender/lump breaker, materials transfer, elevator conveyer, blender elevator, outbound storage tank, product loadout and packaging facility must operate properly to ensure compliance with 326 IAC 6-3 (Process Operations), New Source Performance Standards 40 CFR 60.250 through 60.254, Subpart Y, and 40 CFR 60.670, Subpart OOO, 326 IAC 2-8 (Federally Enforceable State Operating Permit Program), and also to ensure that the requirements of 326 IAC 2-7 (Title V) do not apply.

Proposed Changes to FESOP 123-12215-00021

A.2 Emission Units and Pollution Control Equipment Summary [326 IAC 2-8-3(c)(3)]

This stationary source consists of the following emission units and pollution control devices:

- (a) one (1) Coal bulk unloading, handling and storage operation, constructed July 30, 1998, with a maximum capacity of 48 tons per hour (TPH), using a baghouse (BH-13) for PM and PM10 control, and exhausting to a point designated as DC-6, inside the building;
- (b) one (1) Coal milling operation, constructed July 30, 1998, with a maximum capacity of 10 TPH, using a baghouse (BH-14) for PM and PM10 control, and exhausting to a point designated as DC-1, inside the building;
- (c) one (1) Coal screening operation, constructed July 30, 1998, with a maximum capacity of 10 TPH, using a baghouse (BH-15) for PM and PM10 control, and exhausting to a point designated as DC-7, inside the building;
- (d) one (1) Raw materials unloading operation, constructed July 30, 1998, with a maximum capacity of 32 TPH, using a baghouse (BH-01) for PM and PM10 control, and exhausting ~~to one (1) stack, identified as DC-5~~ **inside the building**;
- (e) one (1) Raw materials storage tank identified as Tank A, constructed July 30, 1998, with a maximum capacity of 32 TPH, using a baghouse (BH-02) for PM and PM10 control, and exhausting to a point designated as BV-A, inside the building;

- (f) one (1) Raw materials storage tank identified as Tank C, constructed July 30, 1998, with a maximum capacity of 32 TPH, using a baghouse (BH-03) for PM and PM10 control, and exhausting to a point designated as BV-C, inside the building;
- (g) one (1) Raw materials storage tank identified as Tank B&D, constructed July 30, 1998, with a maximum capacity of 32 TPH, using a baghouse (BH-04) for PM and PM10 control, and exhausting to a point designated as BV-BD, inside the building;
- (h) one (1) Elevator Conveyer identified as # 1, constructed July 30, 1998, with a maximum capacity of 35 TPH, using a baghouse (BH-17) for PM and PM10 control, and exhausting ~~to one (1) stack, identified as BV-1~~ **inside the building**;
- (i) one (1) Elevator Conveyer identified as # 2, constructed July 30, 1998, with a maximum capacity of 35 TPH, using a baghouse (BH-18) for PM and PM10 control, and exhausting ~~to one (1) stack, identified as BV-2~~ **inside the building**;
- (j) one (1) Blender/Lump breaker operation, constructed July 30, 1998, with a maximum capacity of 35 TPH, using a baghouse (BH-05) for PM and PM10 control, and exhausting to a point designated as DC-4 inside the building;
- (k) one (1) Materials transfer operation, constructed July 30, 1998, with a maximum capacity of 35 TPH, using a baghouse (BH-12) for PM and PM10 control, and exhausting ~~to one (1) stack, identified as DC-8~~ **inside the building**;
- (l) one (1) Blender elevator, constructed July 30, 1998, with a maximum capacity of 35 TPH, using a baghouse (BH-06) for PM and PM10 control, and exhausting to a point designated as BV-3, inside the building;
- (m) one (1) Outbound storage tank, constructed July 30, 1998, with a maximum capacity of 35 TPH, using a baghouse (BH-789) for PM and PM10 control, and exhausting ~~to one (1) stack, identified as BV-4~~ **inside the building**;
- (n) One (1) Product loadout operation, constructed July 30, 1998, with a maximum capacity of 100 TPH, using a baghouse (BH-10) for PM and PM10 control, and exhausting to a point designated as DC-3, inside the building; and
- (o) One (1) Packaging operation, constructed July 30, 1998, with a maximum capacity of 7 TPH, using a baghouse (BH-11) for PM and PM10 control, and exhausting ~~to one (1) stack, designated as DC-2~~ **inside the building**.

SECTION D.1 FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-8-4(10)]:

- (a) one (1) Coal bulk unloading, handling and storage operation, with a maximum capacity of 48 tons per hour (TPH), using a baghouse (BH-13) for PM and PM10 control, and exhausting to a point designated as DC-6, inside the building;
- (b) one (1) Coal milling operation, with a maximum capacity of 10 TPH, using a baghouse (BH-14) for PM and PM10 control, and exhausting to a point designated as DC-1, inside the building;
- (c) one (1) Coal screening operation, with a maximum capacity of 10 TPH, using a baghouse (BH-15) for PM and PM10 control, and exhausting to a point designated as DC-7, inside the building;
- (d) one (1) Raw materials unloading operation, constructed July 30, 1998, with a maximum capacity of 32 TPH, using a baghouse (BH-01) for PM and PM10 control, and exhausting to ~~one (1) stack, identified as DC-5~~ **inside the building**;
- (e) one (1) Raw materials storage tank identified as Tank A, with a maximum capacity of 32 TPH, using a baghouse (BH-02) for PM and PM10 control, and exhausting to a point designated as BV-A, inside the building;
- (f) one (1) Raw materials storage tank identified as Tank C, with a maximum capacity of 32 TPH, using a baghouse (BH-03) for PM and PM10 control, and exhausting to a point designated as BV-C, inside the building;
- (g) one (1) Raw materials storage tank identified as Tank B&D, with a maximum capacity of 32 TPH, using a baghouse (BH-04) for PM and PM10 control, and exhausting to a point designated as BV-BD, inside the building;
- (h) one (1) Elevator Conveyer identified as # 1, constructed July 30, 1998, with a maximum capacity of 35 TPH, using a baghouse (BH-17) for PM and PM10 control, and exhausting to ~~one (1) stack, identified as BV-1~~ **inside the building**;
- (i) one (1) Elevator Conveyer identified as # 2, constructed July 30, 1998, with a maximum capacity of 35 TPH, using a baghouse (BH-18) for PM and PM10 control, and exhausting to ~~one (1) stack, identified as BV-2~~ **inside the building**;
- (j) one (1) Blender/Lump breaker operation, constructed July 30, 1998, with a maximum capacity of 35 TPH, using a baghouse (BH-05) for PM and PM10 control, and exhausting to a point designated as DC-4 inside the building;
- (k) one (1) Materials transfer operation, constructed July 30, 1998, with a maximum capacity of 35 TPH, using a baghouse (BH-12) for PM and PM10 control, and exhausting to ~~one (1) stack, identified as DC-8~~ **inside the building**;
- (l) one (1) Blender elevator, constructed July 30, 1998, with a maximum capacity of 35 TPH, using a baghouse (BH-06) for PM and PM10 control, and exhausting to a point designated as BV-3, inside the building;

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Facility Description [326 IAC 2-8-4(10)]:

- (m) one (1) Outbound storage tank, constructed July 30, 1998, with a maximum capacity of 35 TPH, using a baghouse (BH-789) for PM and PM10 control, and exhausting ~~to one (1) stack, identified as BV-4 inside the building;~~
- (n) One (1) Product loadout operation, constructed July 30, 1998, with a maximum capacity of 100 TPH, using a baghouse (BH-10) for PM and PM10 control, and exhausting to a point designated as DC-3, inside the building; and
- (o) One (1) Packaging operation, constructed July 30, 1998, with a maximum capacity of 7 TPH, using a baghouse (BH-11) for PM and PM10 control, and exhausting ~~to one (1) stack, designated as DC-2 inside the building.~~

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

D.1.8 Testing Requirements [326 IAC 2-1.1-11]

~~During the period between 36 and 42 months after issuance of this permit, in order to demonstrate compliance with Condition D.1.4, the Permittee shall perform PM testing source-wide utilizing methods as approved by the Commissioner. This test shall be repeated at least once every five (5) years from the date of this valid compliance demonstration.~~

The OAQ will not require testing of units while exhausting inside the building. However, units shall be tested to demonstrate compliance with condition D.1.4 within six (6) months of being redirected to venting to the atmosphere. The Permittee shall perform PM testing utilizing methods approved by the commissioner. This test shall be repeated at least once every five (5) years from the date of this valid compliance demonstration.

D.1.9 Visible Emissions Notations

- (a) ~~Visible emission notations of the raw materials unloading (DC-5), materials transfer (DC-8), elevator conveyers (#1 (BV-1) and # 2 (BV-2)), outbound storage tank (BV-4), and packaging (DC-2) facilities stack exhausts shall be performed once per shift during normal daylight operations when exhausting to the atmosphere. A trained employee shall record whether emissions are normal or abnormal.~~
- (b) ~~For processes operated continuously, "normal" means those conditions prevailing, or expected to prevail, eighty percent (80%) of the time the process is in operation, not counting startup or shut down time.~~
- (c) ~~In the case of batch or discontinuous operations, readings shall be taken during that part of the operation that would normally be expected to cause the greatest emissions.~~
- (d) ~~A trained employee is an employee who has worked at the plant at least one (1) month and has been trained in the appearance and characteristics of normal visible emissions for that specific process.~~
- (e) ~~The Compliance Response Plan for this unit shall contain troubleshooting contingency and~~

~~response steps for when an abnormal emission is observed. Failure to take response steps in accordance with Section C – Compliance Monitoring Plan – Failure to Take Response Steps, shall be considered a violation of this permit.~~

D.1.12 Record Keeping Requirements

- ~~(a)~~ To document compliance with Condition D.1.9, the Permittee shall maintain records of daily visible emission notations of the coal bulk unloading, handling and storage, coal milling, coal screening, raw materials storage and unloading, blender/lump breaker, materials transfer, elevator conveyers (#1 and # 2), blender elevator, outbound storage tank, product loadout and packaging facilities stack exhausts.
- ~~(b)~~ (a) To document compliance with Condition ~~D.1.10~~ D.1.9, the Permittee shall maintain the following:
 - (1) Once per shift records of the following operational parameters during normal operation when venting to the atmosphere:
 - (A) Inlet and outlet differential static pressure; and
 - (B) Cleaning cycle operation.
 - (2) Documentation of the dates vents are redirected.
- ~~(c)~~ (b) To document compliance with Condition D.1.10, the Permittee shall maintain records of the results of the inspections required under Condition D.1.10 and the dates the vents are redirected.
- ~~(d)~~ (c) All records shall be maintained in accordance with Section C - General Record Keeping Requirements, of this permit.

Conclusion

This permit revision shall be subject to the conditions of the attached proposed **Minor Permit Revision No. 123-18111-00021**.
